

RESERVOIRS CAN BE DANGEROUS

STAY OUT!

STAY SAFE!

- 1 Banks of reservoirs are often steep and slippery
- 2 Reservoirs are deep, the water is much too deep to stand up in
- 3 Strong currents in reservoirs could pull you under
- 4 Water in reservoirs is very cold - too cold for swimming
- 5 Reservoirs are lonely places, no one may see or hear you if you are in trouble
- 6 Buildings by reservoirs often contain dangerous machinery
- 7 Don't walk on ice, people can drown
